Overlap		Circles	Triangles – mid-plane
Gas		Squares	Circles – highest plane
Stars		Cones without points	Cylinders

- The models are made of ABS Plastic; the same material used to make Legos.
- ABS Plastic can be dissolved by acetone; this can be used to modify and repair the models.
- The models were made by Replicators (extrusion deposition 3D printers made by Makerbot).
- The models were printed with solid infill to make them as sturdy as possible.
